

Overview

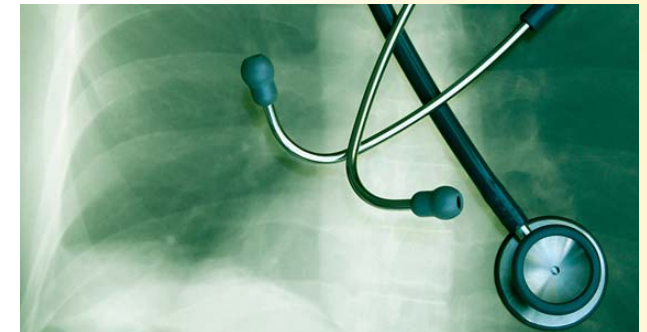

The Division of Pulmonary Medicine and Critical Care is pleased to offer the **2nd Annual Advances in Pulmonary Disease**. This event is designed for physicians, physician assistants, advanced practice providers and nurses in primary care, rheumatology and pulmonology who provide care to patients with COPD, pulmonary embolus, ARDs and pulmonary arterial hypertension (PAH). In addition, a multidisciplinary approach to lung cancer pulmonary disease will be presented. There will be an opportunity to meet faculty and discuss practice issues during the round table discussions. Content will be case-based addressing evidence based approaches to care as well as novel treatments on the horizon.

Learning Objectives:

- Discuss the scientific evidence and translation to practice in the uses of neuromuscular blockade in the patient with ARDS.
- Describe surgical management of sub massive pulmonary embolus.
- Identify current guidelines in order to provide optimal care to patients with COPD.
- Identify current guidelines in order to provide optimal care to patients with pulmonary embolism.
- Discuss management of scleroderma associated with pulmonary hypertension
- Identify current guidelines for identification and treatment of early lung cancer.
- Describe epidemiology of scleroderma-related pulmonary hypertension (PH).
- Describe advances in the screening and evaluation of PH in scleroderma.
- Review advances in therapies for various types of PH in scleroderma.
